

R E M A R K S

Claim 38 has been amended to correctly recite an illumination switching method in accordance with its parent claim 34.

No new matter has been added, and no new issues with respect to patentability have been raised.

The amendment to claim 38 is necessary for the proper understanding of the claims, so as to properly protect the present invention. The amendment to claim 38 was not presented earlier because the error was only recently made in the Amendment filed on August 22, 2006, and the error has just come to the attention of the undersigned.

It is respectfully submitted that amended claim 38 remains in condition for allowance based on its dependence from allowed independent claim 34. Accordingly, it is respectfully submitted that no new search or examination is required, and that the amendment to claim 38 does not require any substantial amount of additional work on the part of the Office.

In view of the foregoing, it is respectfully requested that this Amendment be approved and entered under 37 CFR 1.312.

If the Examiner has any comments, questions, objections or recommendations, the Examiner is invited to telephone the undersigned for prompt action.

Respectfully submitted,

/Douglas Holtz/
